

Apache

TECHNICAL INFORMATION

Nene Valley
LEATHER

Apache

Apache is a beautiful distinctive leather with a waxy feel and crackled appearance. A resilient coating has been applied to help prevent soiling and scratching making it ideal for domestic upholstery and contract environments making it a favourite for manufacturers and specifiers alike. The distinctive qualities of this leather along with the distressed matt finish are its smooth silky hand feel and natural characteristics across the surface of the hide.

Classed as pigmented it is suitable for residential, general contract and automotive & marine applications. The large clean hides are specially selected to achieve very good cutting yield.

NATURAL LEATHER

Leather is a natural product, and the uniqueness of each hide is hallmarked on occasion by grown mark, scars, variations in grain and other natural characteristics which add to the beauty of real leather and should not be regarded as a defect.

All our hides are responsibility sourced and are, by nature, a by-product of the food industry and therefore we up cycle a natural substance that would otherwise end up in landfill and process it into a long-lasting material.

Due to the natural properties of leather colour and texture variations may occur between batches.

CARE INSTRUCTIONS

- 

Vacuum and dust frequently with a soft cloth.
- 

Do not allow body oils, alcohol-based sanitizers, perspiration or hair products to settle into the grain of the Leather as these will gradually break down the finish.
- 

Clean regularly with a damp cloth (not over-wet) using circular motions until the dirty parts are clean, then dry immediately with a soft cloth.
- 

If necessary, add a little soapy water to the above process providing NO DETERGENTS are used.
- 

NEVER USE SADDLE SOAP, WAX OR SPRAY POLISH WHICH MAY CAUSE IRREVERSIBLE DAMAGE.
- 

For rare, awkward stains a wide range of proprietary Leather Care cleaners can be obtained, following closely the manufacturers’ instructions.
- 

After cleaning a neutral Leather Cream may be used to restore the original sheen (proprietary products only).
- 

Too frequent or over-enthusiastic cleaning or application of Leather Cream may wear away the upper, darker coat to reveal more of the lighter base coat.
- 

Avoid sharp objects such as belts, buckles, studs and zips scratching the surface of the Leather.
- 

Protect Leather furniture from direct sunlight.
- 

Avoid drying out the Leather by keeping it away from direct heat sources such as fires and radiators.

Beautiful Leathers,
Sustainably Produced
