NATURAL LEATHER

Leather is a natural product, and the uniqueness of each hide is hallmarked on occasion by grown mark, scars, variations in grain and other natural characteristics which add to the beauty of real leather and should not be regarded as a defect.

All our hides are responsibility sourced and are, by nature, a by-product of the food industry and therefore we up cycle a natural substance that would otherwise end up in landfill and process it into a long-lasting material.

Due to the natural properties of leather colour and texture variations may occur between batches.

CARE INSTRUCTIONS

Vacuum and dust frequently with a soft cloth.

After cleaning a neutral Leather Cream may be used to restore the original sheen (proprietary products only).

Do not allow body oils, alcohol-based sanitizers, perspiration or hair products to settle into the grain of the Leather as these will gradually break down the finish.

Too frequent or over-enthusiastic cleaning or application of Leather Cream may wear away the upper, darker coat to reveal more of the lighter base coat.

Clean regularly with a damp cloth (not over-wet) using circular motions until the dirty parts are clean, then dry immediately with a soft cloth.

Avoid sharp objects such as belts, buckles, studs and zips scratching the surface of the Leather.

If necessary, add a little soapy water to the above process providing NO DETERGENTS are used.

Protect Leather furniture from direct sunlight.

NEVER USE SADDLE SOAP, WAX OR SPRAY POLISH WHICH MAY CAUSE IRREVERSIBLE DAMAGE.

Avoid drying out the Leather by keeping it away from direct heat sources such as fires and radiators.

For rare, awkward stains a wide range of proprietary Leather Care cleaners can be obtained, following closely the manufacturers' instructions.
